IJEEABS' FIRST VOLUME

India today needs international-standard research-based home of Institutions that would support modern research and also create potential resources for innovative research and education in the rapid changing and technology-driven world of the current century.

The IJEEABS is doing its best to recognize and make true this concept. The Raja Institute of Science and Technology comprehends the fact that it is its primary duty to update and adapt itself rapidly to the needs of the world to make education and research flourishing, significant and pertinent. The Institution is proud of the reality that it is in the process of accomplishing its objectives by means of the dedicated and hardworking efforts of its teachers and researchers.

The Journal Authority expresses its gratitude for the researchers who have published their research works in our Journal. The Editorial Board of this journal would expect suggestions and earnestly hope your precious and productive implications would make our publication successful and fruitful.
